

Name _____ Period _____

Skill 14.1 Exercise 1

Refer to the image below to answer the following,

Who lives at index = 0?	
Who lives at index = 2?	
If the houses on the street represent an array, how long is the array?	
Who lives at index = 4?	
What is Marvin's address?	
What is Kyle's address?	

Skill 14.2 Exercise 1

The image below represents an array of String type variables called houses. The value associated with each house corresponds to the name of the person who lives there.

- Write code that could be used to declare and initialize the array, but does not populate it.
- Write the address of each house on the roof.
- Write code that could be used to assign the value of house 3 to "Wilma", and the value of house 6 to "Barney", and the value of house 2 to "Homer"
- What is the value of the house with address 4?

Name _____ Period _____

(e) Homer and Barney have decided to trade houses. Write code to assign Homer and Barney to their new homes.

Skill 14.3 Exercise 1

A new neighbor named “Wirt” has moved into the neighborhood from the previous exercise. You have no idea which house he lives in. Write a for-each loop to iterate over all the houses in the neighborhood and locate “Wirt”.

Skill 14.3 Exercise 2

Two new houses are being built in the neighborhood so you will need a new array to store all the people. Create a new array that is two houses larger than the neighborhood in the previous exercise. Copy all the values from the previous array into the new array.
