3. Consider each statement separately. Identify it as legal or illegal. If illegal, explain why.

```
double distance = 12;
int laps = 4.5;
double temperature = 72.5;
int degrees = (int) 72.5;
int whole = 72.5;
```

/5

4. Complete each task using valid Java code or notation.

© The learn Project

(a) Declare and initialize each variable: boolean isReady set to true String message set to "Variables are useful!" char grade set to 'A'	
(b) Label each variable name legal or illegal: 2ndPlace studentName class
