Skill Check 2 Review FRQ Solutions
AP Computer Science A

Name _____ Period_____

1. Complete the following code segments.

(a) Write code that will assign the value of "Computer Science is Cool" to the String variable "g". Then have it print this String in all lower case.

```
String g = "Computer Science is Cool";
System.out.println(g.toLowerCase());
```

(a) Initialize a String variable b to "Four score and seven years ago". Print all the characters between (not inclusive) the first "s" in score and the "y" in years (EX: "core and seven ")

```
String b = "Four score and seven years ago";
System.out.println(b.substring(5, 22))
```

(c) Write code that will produce the following printout using only a single println(),

Hello
Hello Again

```
System.out.println("Hello\nHello Again");
```

(d) Write code that will print the following to the consol,

"Look here!"

Note, the quotes must display when printed.

```
System.out.println("\"Look here!\"");
```

Name _____ Period_____

2. Write a driver class called WordScramble that extracts the first half and second half of the word, then recombines the halves such that the last half is printed first followed by the first half.

   Below is sample output that illustrates what your code should output for various words,

Word	**Output**
popcorn	cornpop
bike	kebi
school	oolsch

```
public class WordScramble{
     public static void main(String args[]){

          int mid = word.length()/2;
          String firstHalf = word.substring(0, mid);
          String secondHalf = word.substring(mid);
          String scrambled = secondHalf + firstHalf;
          System.out.println(scrambled);
     }
}
```
