AP Computer Science A
Ticket Out the Door
Set 3: Numeric Operations

Name _____ Period _____

Skill 3.1 Exercise 1
(a) On one line, declare three double variables named x, y, and z. (b) On one line, declare and initialize int variables a, b, and c to 4, 7, and 10, respectively.

Skill 3.2 Exercise 1	
Write the exact output for each code segment. Place each printed value on a separate line.	

`int x = 2;`
`int y = 3;`
`int z = x + y;`
`x = x + z;`
`System.out.println(x+1);`	

`int x = 1;`
`int y = 5;`
`int z = x - y;`
`x = x - z;`
`System.out.println(x-1);`	

`int x = 2;`
`int y = 3;`
`int z = x * y;`
`x = x * z;`
`System.out.println(x*2);`	

`int x = 13;`
`int y = 5;`
`System.out.println(x / y);`	

`int x = -11;`
`int y = 3;`
`System.out.println(x % y);`

Set 3: Numeric Operations

Name _____ Period _____

Skill 3.3 Exercise 1	
Write the exact output for each code segment. Place each printed value on a separate line.	

`int x = 1;`
`x = x + 3;`
`System.out.println(x++);`
`System.out.println(++x);`	

`int y = 10;`
`y = y - 1;`
`System.out.println(y--);`
`System.out.println(--y);`	

Skill 3.4 Exercise 1	
Write the exact output for each code segment. Place each printed value on a separate line.	

`int x = 1;`
`x += 8;`
`System.out.println(x);`	

`int y = 11;`
`int d = 2;`
`y -= 3 + d;`
`System.out.println(y);`	

`int z = 3;`
`int i = 2;`
`z *= 5 + i;`
`System.out.println(z);`	

`int w = 15;`
`int y = 1;`
`w /= 3 + y;`
`System.out.println(w);`	

`int z = 15;`
`int y = 1;`
`z %= 3 + y;`
`System.out.println(z);`

Set 3: Numeric Operations

Name _____ Period _____

Skill 3.5 Exercise 1	
Write the exact output for each code segment. Place each printed value on a separate line.	
`System.out.println(79 + 3 * (4 + 82 - 68) - 7 + 19);`	
`System.out.println((179 + 21 + 10)/7 + 181);`	

`int p = 40;`
`int q = 4;`
`System.out.println(2 + 8 * q/2 -p);`
