# GitHub Workshop Lab Guide

## Your Tasks (Mark these off as you go)

- ☐ Define key vocabulary
- ☐ Create a GitHub account
- ☐ Install Git on your computer
- ☐ Configure your username and email
- ☐ Install Visual Studio code
- ☐ Clone a repository
- ☐ Complete your assignment with Visual Studio Code
- ☐ Push changes to a repository
- ☐ Receive credit for this lab guide

## ☐ Define key vocabulary

- Open up your browser and search for definitions to the following terms as they relate to "Git". For example you could type "Git vocabulary".
- Work with your partner to write definitions for the following terms.

| | |
|---|---|
| **Git** | |
| **GitHub** | |
| **repository** | |
| **local** | |
| **remote** | |
| **stage** | |
| **commit** | |
| **push** | |

**SC:** I can use development tools and version control to organize, track, and submit my programming work

| | |
|---|---|
| | |

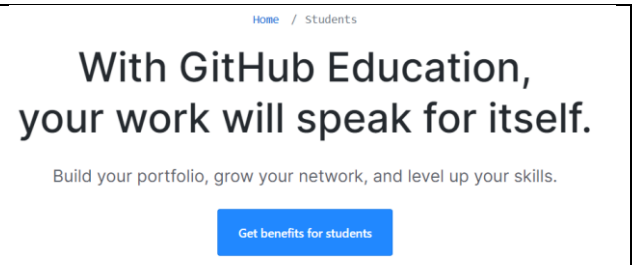

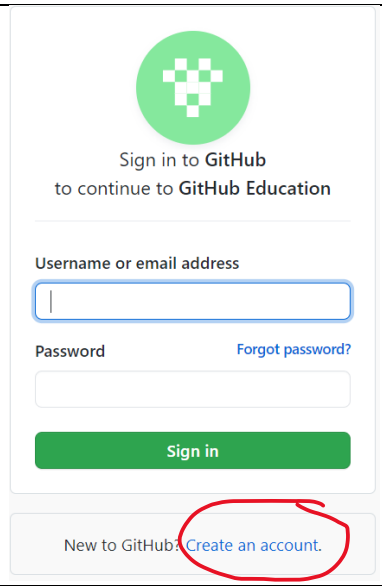

| | |
|---|---|
| **clone** | |

| | |
|---|---|
| **fork** | |

| | |
|---|---|
| **pull** | |

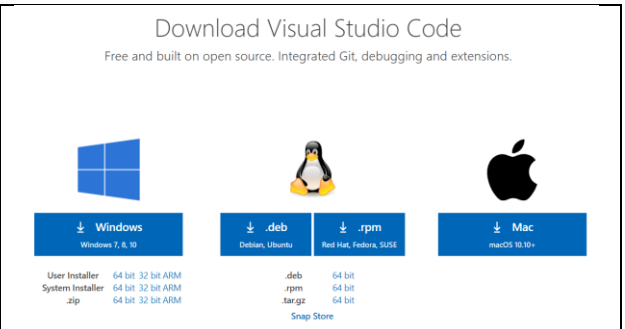

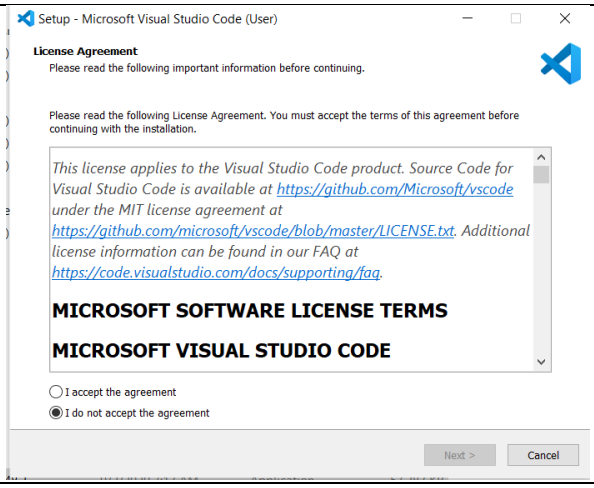

| | |
|---|---|
| **origin/master** | |

## ☐ Create a GitHub account

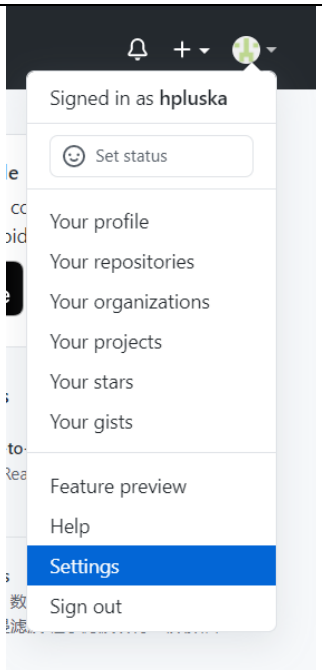

| | |
|---|---|
| Navigate to the following address,<br><br>https://education.github.com/students<br><br>Locate the *Get Benefits for Students* button and click on it. |  |
| Locate the *Create an account* link and click on it.<br><br>Create your account when prompted |  |

© The learn Project

## ☐ Install Visual Studio Code

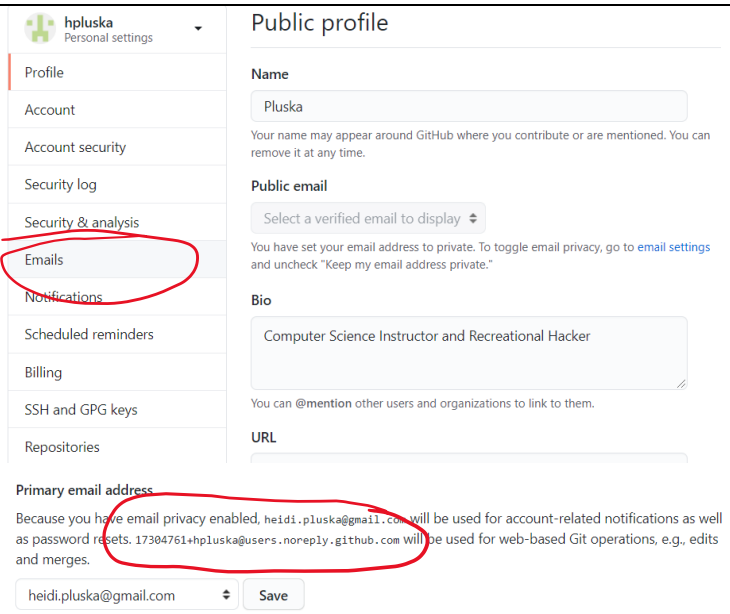

| | |
|---|---|
| Navigate to https://code.visualstudio.com/download and download Visual Studio Code |  |
| Locate the file and install per your operation system |  |

## ☐ Configure your username and email

| | |
|---|---|
| Log in to GitHub and locate your no-reply email<br><br>- Click on *Settings* from your start menu<br>- In the left menu, click on *Emails*<br>- In the Primary Email Address section copy the no-reply email provided in the text |  |

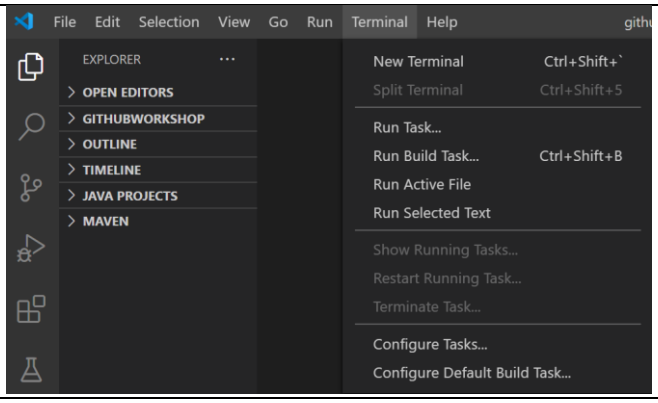

**SC:** I can use development tools and version control to organize, track, and submit my programming work

Open a Terminal

- Open Visual Studio Code
- From the menu at the top, select *Terminal*, *New Terminal*

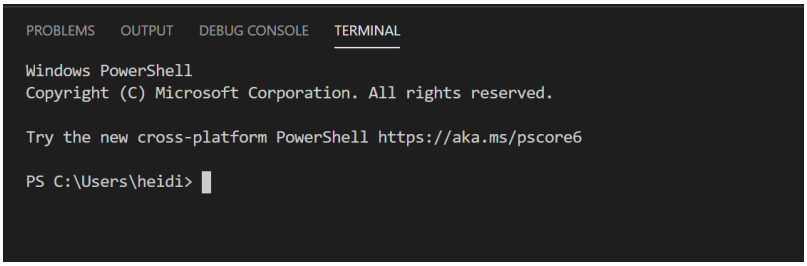

Set the Git commit username and email on your local computer to the ones you used on your GitHub account.

- Locate the terminal window at the bottom of the screen.
- At the terminal prompt, type the following command, paste the email you just copied in between the quotes, then hit *Enter.*

```
git config --global
user.email "paste the
email you just copied
here"
```

- To set your username, copy the following command, type your GitHub username in the quotes, then hit *Enter*.

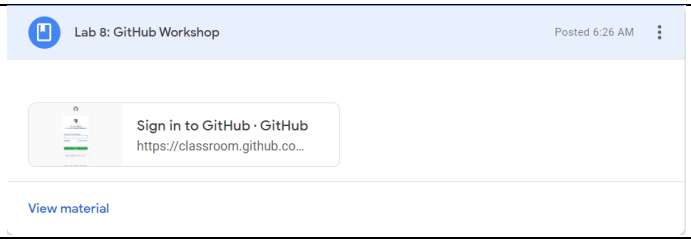

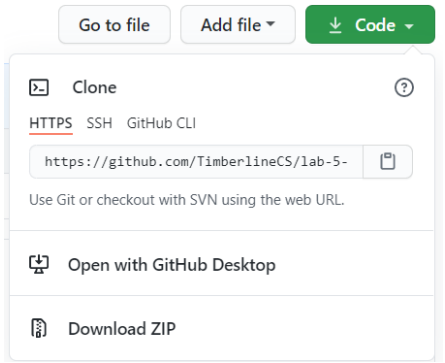

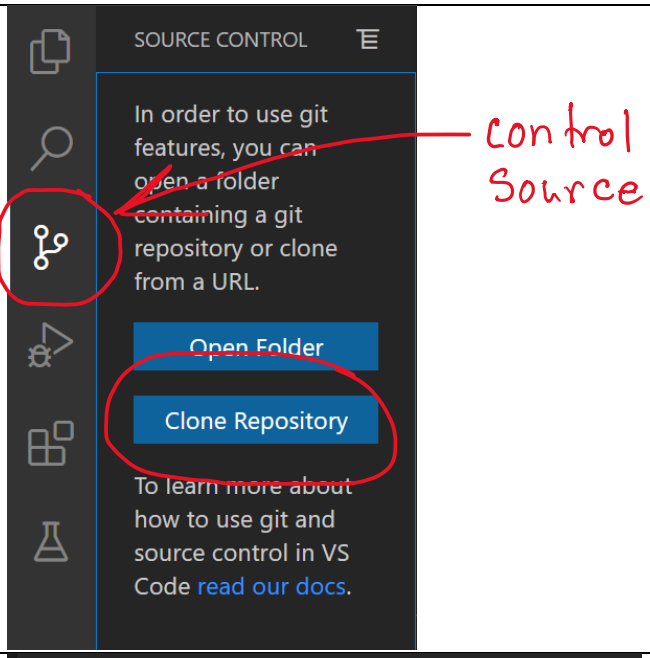

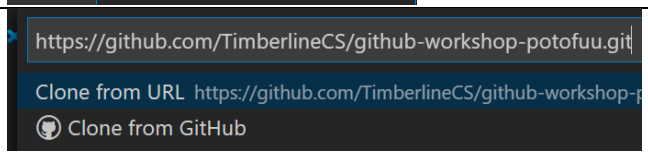

```
git config --global
user.name "paste your
username here"
```

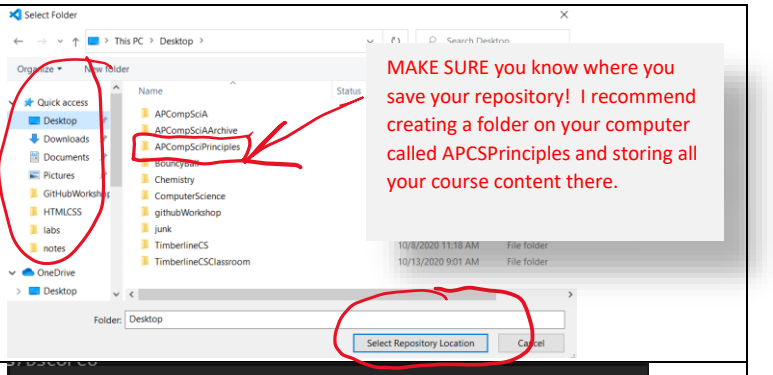

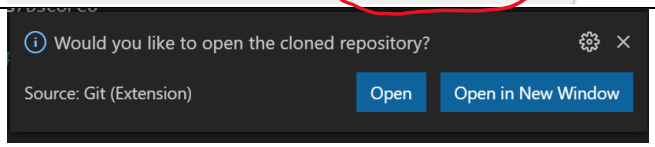

**SC:** I can use development tools and version control to organize, track, and submit my programming work

## □ Clone a repository

| | |
|---|---|
| Navigate the classroom and locate the assignment. Accept the assignment you have been assigned using the link provided by Pluska. |  |
| In the GitHub assignment repository you just accepted, locate the Code button and copy the https link |  |
| Return to Visual Studio Code<br>- Click on the *Control Source* icon in the left menu<br>- Click on the *Clone Repository* button |  |
| Locate the text box at the top of the window and paste the URL to the repository you just copied, then click *Enter* |  |

© The learn Project

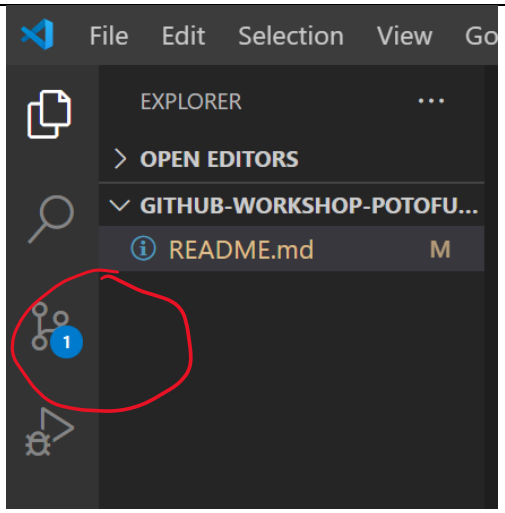

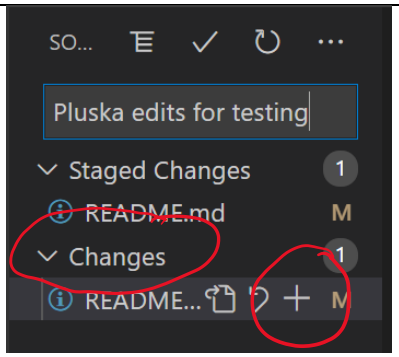

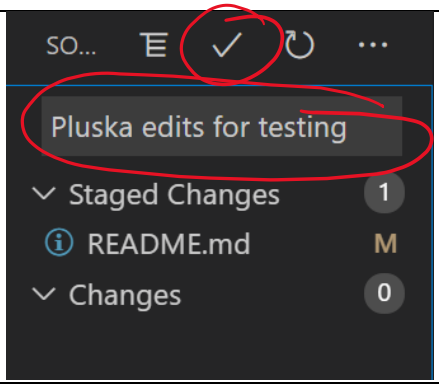

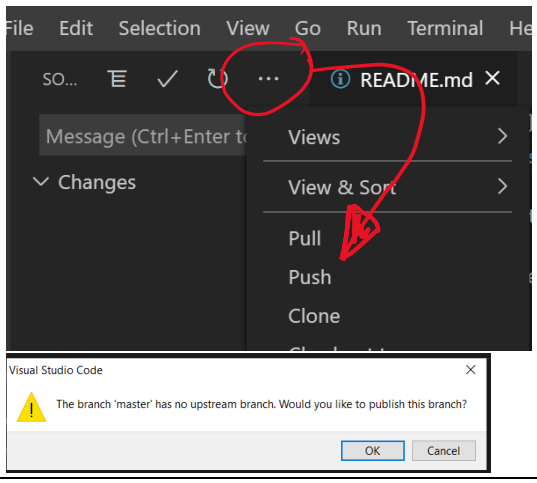

| | |
|---|---|
| Navigate to where you would like to store the repository.<br><br>The click *Select Repository Location* |  |
| In the bottom right corner of the screen locate the *Would you like to open the cloned repository?* Window. Click the *Open* button |  |

## ☐ Complete your assignment with Visual Studio Code

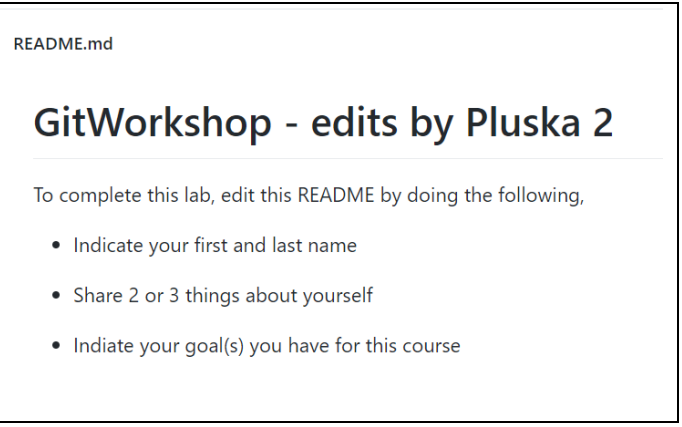

| | |
|---|---|
| - Locate the *README.md* file in the left menu and click on it. |  |
| The file you clicked on is now open in the editor window. Answer the prompts. When you are done, type *ctrl-s* to save your file. You can also save your file by selecting *Save* from the *File* menu. |  |

© The learn Project

## ☐ Push changes to a repository

| | |
|---|---|
| After you save the file you have changed, a blue circle with a number will appear on the Source Control icon. This means you have 1 pending change to push to GitHub. Click on the source control icon to open the Git menu. |  |
| Pushing your work back to GitHub is a three part process – Stage, Commit, Push.<br><br>You will notice Visual Studio Code tracks the changes you have made to files. Locate the file you just changed under the *Changes* tab. Then click the plus sign next to it to stage your changes. |  |
| To commit your changes you must first type a message in the dialogue box. This message should be descriptive and brief. Click the check mark when done. |  |
| To push your changes back to GitHub, select Push from the Source Control menu. Access this by clicking on the 3 dots.<br><br>If you see the warning message, just click *OK*. You should only see this the first time you push. |  |

| | |
|---|---|
| Now return to your GitHub assignment repository and refresh the page. Check out your edited file!<br><br>BAM! |  |

## ☐ Receive Credit for this lab guide

Submit this portion of the lab to Google Classroom to receive credit for the lab guide.
